

ALBERTO GUTIÉRREZ RODRÍGUEZ

Aspiring Junior AI Engineer | Data Engineering & Systems Integration

Seville, Spain · +34 611 430 919 · albertogr.contacto@gmail.com · linkedin.com/in/agutrod

PROFILE

Software engineer with 5+ years integrating data and processes across mission-critical enterprise systems (SAP S/4HANA), now in active transition toward AI Engineering. My day-to-day work has essentially been data engineering: extracting, transforming, validating, and integrating information across systems (OData, SOAP, JSON, IDoc) so real businesses could make decisions on reliable data. I'm now applying that same discipline — plus Python, data analysis, and modern generative AI tooling — to building intelligent solutions.

TECHNICAL SKILLS

AI & Data: Python, Data Analysis, Data Engineering

Development & Tools: JavaScript, C#, Git, PL-SQL, Agile methodologies

Enterprise Systems: SAP ABAP (S/4HANA, ECC), SAP FI, SAP SD, SAPUI5/OData, PI/PO integration

PROFESSIONAL EXPERIENCE

ABAP Developer (S/4HANA)

Oct 2023 – Feb 2024

Almato — client Cunova

- Designed and implemented data validation and integrity processes for customer contracts (data-quality checks).
- Built internal APIs (CRUD via OData/SAPUI5) exposing business data to other applications.
- Optimized queries and modeled views/domains over large transactional data volumes.
- Implemented unit testing as part of the development cycle.

ABAP Developer (S/4HANA)

Jan 2022 – Sep 2022

Minsait — clients Deoleo & Pescanova

- Built data extraction, transformation, and delivery pipelines (CDS views) between systems.
- Integrated cloud services via SOAP; wrote JSON data-ingestion scripts (Groovy).
- Automated filtering and validation of employee data profiles (SuccessFactors).
- Produced technical documentation for cross-team knowledge transfer.

Junior ABAP Developer (ECC)

Feb 2021 – Dec 2021

NTTDATA — clients Volkswagen & Damm

- Designed table schemas and data types for contract-generation processes (data modeling).
- Built a real-time monitoring/inventory system (status tracking).
- Collaborated with cross-functional teams translating business requirements into data logic.
- Presented technical progress in English during sprint reviews, in an international Agile environment.

Intern | ABAP Developer (ECC)

Dec 2019 – Dec 2020

Deloitte DxD — clients Nortegas & Santalucía

- Built system-to-system integration interfaces (SAP PI/PO).
- Mapped data across XML, JSON, and IDoc formats; tested connections and data integrity.
- Automated invoice generation and multi-channel delivery; processed CSV files.

EDUCATION

Higher Technician (Associate Degree equivalent) in Web Application Development — I.E.S. Martínez Montañés, 2022

Higher Technician (Associate Degree equivalent) in Multiplatform Application Development — I.E.S. Néstor Almendros, 2019

LANGUAGES

Spanish (native) · English (full professional) · French (basic professional)

AREAS OF INTEREST

Artificial Intelligence · Machine Learning · Predictive Analytics · Big Data · Cloud Development
